

# The Future of In-Person Primary Care.

## What is Direct Primary Care?

Direct Primary Care doctors are high-quality physicians who rejected the traditional fee-for-service insurance model where most of their time is spent on back-office paperwork like charting and billing. Instead, these doctors set off on their own to make sure they could spend their time and energy on ensuring that their patients stay healthy.

The future of primary care is independent. ***Just like you.***

## Things to love about Direct Primary Care :

- You'll build a long term relationship with your doctor and work towards your health goals together
- Same-day or next-day visits, with up to an hour with your doctor.
- Unlimited visits with no copays. Ever.
- 24/7 access to your doctor through their personal cell phone.

# The Future of Virtual Primary Care

## What is Virtual Direct Primary Care?

Decent now offers Virtual Direct Primary Care - access to a direct primary care doctor remotely through telemedicine. You get the same benefits as Direct Primary Care through video calls at your convenience with a direct primary care doctor that can write all of your referrals and prescriptions from your house.

## Things you'll love about Virtual Direct Primary Care :

- Build a relationship with your doctor by having the same US based doctor for every visit via video call.
- Same day or next day video visits, with up to an hour of appointment time.
- Unlimited video visits with no copays. Ever.
- 24/7 text messaging with your doctor.
- Plans with premiums on average \$50 lower per month.
